Privacy Policy of Sight Meter

This Application collects some Personal Data from its Users.

Personal Data collected for the following purposes and using the following services:

- **Beta Testing**
  - **TestFlight**

Information Shared by Using TestFlight

The following data is shared with the developer and Apple when you use TestFlight. If you accepted an invitation through a public link only, your email address and name are not visible to the developer.

Data	Description
Email address	The email address you were invited to test the app with. This may or may not be the same as the Apple ID associated with your device. If you were invited with a public link, this information is not displayed to the developer.
Name	Your first and last name as entered by the developer when they invited you to test the app using your email address. If you were invited with a public link, this information does not display.
Invitation Type	Whether you were invited by email or through a public link.
Status	The status of your invitation. This can be Invited, Accepted, or Installed. This changes based on your status, and is refreshed when you accept or install a beta build.
Installs	The number of times you've installed a beta app build.
Sessions	The number of times you have used a beta app build.
Crashes	The number of crashes per beta app build.

Data Shared when Sending Feedback (iOS only)

When you send feedback from the TestFlight app or send crashes or screenshots

from the beta app, the following additional information is shared. If your device is running iOS 12.3 or earlier, this information is only shared with the developer. If your device is running iOS 13 beta or later, this information is shared with the developers and with Apple. This data is retained for one year.

Data	Description	When this data is included
App Name	The name of the app you are testing.	Included in all feedback
App Version	The most recent version and build that you have access to. This is the number that displays under the app name in the list of apps in TestFlight.	Included in all feedback
Installed App Version	The version and build you have installed on your device.	Included in all feedback
Device	The model of your device.	Included in all feedback
iOS Version	The version of iOS your device is running.	Included in all feedback
Language	Your device language.	Included in all feedback
Carrier	Your wireless service provider.	Included in all feedback
Timezone	The timezone your device is set to.	Included in all feedback
Architecture	The type of Central Processing Unit (CPU) for your device.	Included in all feedback
Connection Type	Whether you were connected to WiFi, cellular, or not connected at the time that the feedback was sent and your network type.	Included in all feedback

Paired Apple Watch	If there is an Apple Watch app, the Apple Watch model and watchOS version is shared with the developer.	Included in all feedback
Screenshot	The screenshots you share when providing feedback.	Only on devices running iOS 13 beta or later
Comments	The comments you share when providing feedback.	Only on devices running iOS 13 beta or later
App uptime	The length of time the app was open and running at the time the feedback was sent.	Only on devices running iOS 13 beta or later
Disk Free	The amount of disk space you have available at the time the feedback was sent.	Only on devices running iOS 13 beta or later
Battery	Your battery level at the time the feedback was sent.	Only on devices running iOS 13 beta or later
Screen Resolution	The screen resolution of your device.	Only on devices running iOS 13 beta or later
Crash Log	Symbolicated crash logs. This includes information about how long the app was running before it crashed.	Only on devices running iOS 13 beta or later
